3

Engine behind TekHub

Tools - Technologies - Libraries

Editors

Android Studio 3.5.3
NetBeans IDE 8.0.2

Back End Technology

Java API for RESTful
Web Services

Database

Amazon RDS MYSQL
db Instance

Libraries / Services

JSON, JDBC etc.
Firebase SMS Verification

Challenges

Hardest part of our application

1

Item Image upload directly from mobile/emulator internal memory and conversion of image resource to bitmap object bytes Array base 64 string and save to database.

2

Save and display current state of user when app is stopped or paused

3

Handle date-time difference between RDS database - server - android device/emulator. System time zone(Local) v/s Server time zone(UTC).

4

Integration of Firebase SMS Verification module

Future of TekHub

Future implementations of the application

Messaging service between students and admin.

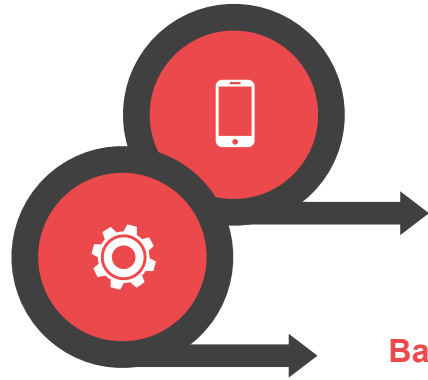

Integration of online payment gateway to allow students to buy products from college or pay late return fine or other fines.

More filters for filtering the item list will be added.

Cross platform application to support both android and iOS platform based devices.
