

EDUCATION

Cegep de la Gaspesie et des Iles

AEC - Mobile Application Development
2018 – 2020

Pune University

Bachelor of Engineering - Computer Engineering
2012 – 2016

SKILLS

Technology / Languages:

- JavaScript - ReactJs, AngularJs, NodeJs, TypeScript, Jest, Webpack, npm, Yarn, Ajax, Redux, Babel, Gulp, JQuery, Express, Passport
- Java - Core, Spring Boot, JDBC
- Scala - Play framework
- HTML5, CSS3 (Tailwind, Ant Design, LESS, SASS, Bootstrap 4, Material-UI, semantic ui)
- Others - JSON, Selenium, Redis, RabbitMQ

Databases / Backend:

- Relational - MySQL, PostgreSQL, Amazon RDS
- NoSQL - Cassandra, AWS DynamoDB, MongoDB
- Others - AWS S3, Nginx, Firebase

Library / API:

- APIs - SendGrid API, Google Map API, PayPal/Stripe payment integration
- ORM - Sequelize and Mongoose
- Others - i18n, Let's Encrypt SSL certificate

IDE / Tools:

- IDE - VS code, IntelliJ, AWS Cloud 9, Eclipse
- Testing - Postman, Selenium

DevOps and Cloud Computing:

- Docker, GIT, Slack, Jira(SCRUM Kanban)
- AWS (EC2, RDS, S3, DynamoDB, Load Balancing, Caching, Amplify, Route53, Lambda, etc)
- Other - Agile, CI/CD GitHub, Containerization

Design and Development:

- Patterns - MVC, Microservices, Serverless
- Wireframes, Prototyping, User Stories
- REST API (Design, Integration, Testing)

INTERNSHIP

Project Leader - Lead developer

Cegep de la Gaspesie Nov 2019 - Mar 2020

- Lead and directed the full-stack development of the entire SDLC from inception to completion in a team of 5 SDEs
- Created and maintained and executed database schemas on AWS RDS, enhancing cloud-based data storage and retrieval efficiency.
- Designed, developed RESTful services in Java.
- Conducted requirements gathering, created user stories, planned sprints, and distributed tasks among the team.
- Added functionality like show product list, filter products, borrow products, search products, add to wishlist, etc.
- Added admin dashboard to maintain (add/update/delete) the users and products from the inventory.

PROFESSIONAL EXPERIENCE

Full-Stack Developer

JDSA Pvt.Ltd | Nov 2024 - Present

- Rejoined the company to lead the modernization of its internal workforce management system, transitioning the platform into a SaaS-ready product.
- Migrated the monolithic architecture to a serverless model using AWS Lambda and API Gateway, significantly reducing infrastructure costs and increasing scalability.
- Rebuilt the frontend using ReactJS, TypeScript, Tailwind CSS, and Redux Toolkit (RTK Query) for efficient state and data management, and tested components using React Testing Library.
- Integrated AWS Amplify for CI/CD, hosting, and real-time deployment across multiple environments.
- Designed and integrated RESTful APIs, multi-tenant database schemas in Amazon RDS (PSQL), and secure document storage using S3.
- Contributed to product architecture, system security, and long-term SaaS roadmap including scaling, and onboarding workflows.

Senior Full-Stack Developer

Tezoo Innovations Pvt. Ltd. (Client: Top Parent) | Jan 2023 – Oct 2024

- Developed a serverless CMS for the Top Parent mobile app using ReactJS, RTK Query, Node.js, AWS Lambda, and Amplify, enhancing content workflow and reducing backend overhead.
- Configured domain routing with Route 53 and integrated S3 for secure media storage and delivery.
- Designed MongoDB schema, implemented secure authentication, and documented APIs using Swagger.
- Engineered a scalable e-commerce platform with ReactJS and Spring Boot, covering product catalog, user auth, and Stripe payments.
- Implemented and optimized AWS Lambda for serverless architecture and built RESTful APIs and asynchronous flows using RabbitMQ, Docker, and PostgreSQL to ensure smooth transaction handling.
- Integrated performance optimizations like lazy loading, code splitting, and reusable components to improve UI responsiveness, and implemented unit and integration tests using Jest.
- Led deployment automation and environment setup using AWS Amplify, Git, and CI/CD pipelines, accelerating release cycles.

Software developer

Lexpand - Nojumi Solutions Inc. | April 2021 - Dec 2022

- Designed and developed a job scheduler tool that can in parallel handle multiple requests to execute, schedule, or reschedule tasks.
- Automated the firm's state machine that handles all the manual tasks of the staff and reduced load by 90%.
- Implemented and optimized a content detection tool for email and message filtering.
- Designed and implemented RESTful APIs for seamless front-end and back-end data exchange.
- Developed Google Workspace add-on using Google Apps Script and a messaging broker tool rabbitMQ.
- Utilized AWS S3 for storing and retrieving data and files in a serverless environment.
- Documented all supported systems and applications to streamline existing business procedures, effectively training new team members and reducing onboarding time by 37%.
- Designed, developed, and implemented serverless data storage solutions using AWS DynamoDB.
- Developed AWS API Gateway for creating and managing RESTful APIs for serverless applications.

Software developer - Full Stack

piknix | June 2020 - May 2021

- Collaborated with the UX/UI team to design a mobile-first, fully responsive e-commerce site.
- Integrated third-party APIs, such as PayPal payment gateway, Google APIs, passport, i18n localization, SendGrid email API, Twilio SMS API
- Implemented and optimized role-based authentication and authorization mechanisms.
- Utilized Docker for local development environments, enabling consistent development setups across different machines and simplifying onboarding of new team members.
- Server setup using nginx as a web server, added SSL certificates and deployed app on DigitalOcean.
- Developed Express MVC framework for NodeJS to create the REST API routes.
- Optimized product catalog management with listing, search, sorting, and filtering features.

Technical Associate

JDSA Pvt. Ltd | Feb 2018 - Jul 2018

- Designed and developed a web application using React.js that streamlined management tasks, reducing workload by 50%.
- Implemented and optimized authentication and authorization, employers can access their profile, job schedule, and salary status.
- Designed and maintained relational database schema using PostgreSQL.
- Developed and maintained an admin dashboard, improving operational efficiency by 30%.
